Our Vision

Teramed healthcare solutions LLC, a One-Stop destination for all your healthcare related technological needs, in order to modernize healthcare facilities not only for today but for years to come.

Company History

Teramed Healthcare Solutions LLC (Formerly Known as Tech Formula Medical System) was founded as a full-service provider in the healthcare industry, in the United Arab Emirates that specializes in the Installation, Repair, Preventative Maintenance, and Safety inspections of Medical equipment. We have been in business since 2008 and have established a loyal customer following as a result of the quality services and personalized attention that we offer to all of our clients. In December 2013 we established our new branch in Dubai for Medical equipments trading and other Healthcare related products. Teramed healthcare solutions LLC fosters its relationships with market leading manufacturers to secure medical equipment and supplies of the highest quality, value and customer support. Our distribution network has a portfolio of around 500 products from reputed manufacturers serving health systems, hospitals, medical centers, doctors' offices and government health organizations throughout the United Arab Emirates and Middle East.

Technical Support

Teramed healthcare solutions LLC has a dedicated, well qualified, experienced service team to provide 24x7 technical support to all our esteemed clients throughout UAE, which is well tailored for the individual needs as per the requirement of Healthcare providers regardless of the size and volume of business they perform. It's more about professionalism that guided our company towards the success where we are at the moment, because each and every feedback from our valuable clients were considered as lesson to learn towards the betterment and quality of service

rendering. Thanks to our well-trained technical team that we provide service support to most sophisticated brand new equipment in different levels such as Embedded system software, Firmware and Hardware solutions. The main highlight is the cost efficient solutions to our clients by performing PCB level corrective maintenance in variety of medical equipment. Our service is available at your fingertip where your medical devices are being taken care same way as professional healthcare facilities

Projects

We are providing comprehensive CAPEX procuring support to new and existing hospitals for its upcoming projects includes Modular Operation Room. Our project management team assists our clients for procuring, designing, installation and commissioning of their projects. This site represents our product and maintenance offerings. Our services includes Consultation services for design, pre-installation requirements of medical devices, providing comprehensive solution in terms of medical, technical and financial guidance for the budgeting, project coordination and implementation of new Hospitals and clinics, as well as renovation and service addition of existing healthcare facilities.

Certified Training Courses

Radiation Safety Training Awareness
